

BLM 1 Map Projection Data Table

Student Name:
Class Period:

GATHERING INFORMATION: Complete the data table by measuring the longest north-south axis of the three countries identified in class. Be careful to consistently measure the north-south axis at the same location on the three countries.

COUNTRY	MAP PROJECTION			
North:				
Equator:				
South:				

CONCLUSION & SUMMARY: What pattern(s) do you detect in the data you have collected from map projection to map projection? How does a country compare from one projection to another? What might explain the pattern(s) you detect?
