## What is a cause?

- According to the dictionary.com:
  - A cause is “a reason for an action or condition.”
  - An effect is defined as “something brought about by a cause or agent; a result.”

## Why does this matter?

To understand what is going on in Israel now, and how it affects other countries in the Middle East and the United States, we need to understand the causes that led to the country of Israel’s existence.

## STEP 1

- Review the data with your group. Discuss possible connections that may exist and how you would be able to best organize the data.
  - Consider a possible problem: what if you don't know anything about the data? What should you and your group do?

## STEP 2

- On a piece of paper, create a rough draft of your visualization. When you have completed the rough draft, confer with the teacher for approval before continuing on to the next step.
  - Consider a possible problem: what is the most effective way to show the connections between multiple causes and effects?

## STEP 3

- On a piece of butcher paper, create a final draft of your visualization. The final draft will represent quality and show the connections between the data.
